

# **Sixth International Conference on UML - Modeling Languages and Applications**

**October 20 - 24, 2003,  
San Francisco, California, USA**

## ***Call for Workshop Proposals***

As in previous years, UML 2003 will host a number of workshops. Workshops are intended to serve as an intensive collaborative forum for exchanging late-breaking or preliminary results, to conduct intensive discussions on a particular topic, or to coordinate efforts among representatives of a technical community. In particular, each workshop should set aside a significant proportion of its time for discussion. We encourage prospective workshop organizers to submit proposals for highly-interactive workshops focusing on either in-depth analysis or broad-ranging approaches to areas related to UML and modeling in general.

Workshops last for one full day and will be held on Monday (October 20) and Tuesday (October 21) at the Fort Mason Center, San Francisco (<http://www.fortmason.org>).

## **Guidelines**

Please, follow the [guidelines](#) for submitting your workshop proposal.

## **Important Dates**

Deadline for submission: April 21, 2003  
Notification of acceptance: April 30, 2003  
Workshop call for papers: TBA  
Workshop paper submission: TBA

## **Submissions**

Electronic submission of proposals is required. Postscript or PDF formats are preferred. Paper and fax submissions will not be accepted.

Proposals should follow the guidelines, and they should be submitted no later than April 21, 2003 to:

Ana Moreira
